

BACKUP AS A SERVICE

Vocus Backup as a Service (BaaS) is your full control backup and recovery service. Bask in the security of backing up over a private connection to our enterprise grade data centres.

OUR SOLUTION FOR YOU

Vocus BaaS puts you in control of your backup and recovery process from start to finish. All your data is backed up to our enterprise-standard data centres via a secure private connection over the Vocus network.

Backup and recovery can be scheduled, managed and audited via your own dedicated portal from anywhere, at any time.

Low risk, payment by consumption options

24/7 operational support and automated service monitoring

Proven Enterprise Cloud platform backed by EMC and CommVault

Service Level Agreements backed by financial safeguards

Local Enterprise-class Vocus data centres in secure locations in Australia

Free from painful tape backups & reliability issues

WHO IS IT FOR?

Vocus Backup as a Service is for large enterprise businesses looking to protect against data loss and optimise uptime.

Medium Business

100 - 500 Staff

Large Business

500+ Staff

FEATURES AND BENEFITS

TOTAL SOLUTION TAILORED FOR ENTERPRISE

- Includes backup software and disk with access to 6 retention policies, so that you can choose the solution that best meets your needs

STORED IN VOCUS' AUSTRALIAN DATA CENTRES

- A copy of your data and servers is backed up to Vocus Cloud (including physical servers, virtual machines and public, private and hybrid clouds)

END TO END DATA ENCRYPTION

- Your backups are secure in flight and at rest in the Vocus Cloud platform with enterprise-grade security.

SPECIFY HOW LONG YOUR DATA IS KEPT

- Long term data retention e.g. end of financial year, legal requirements

AUTOMATED BACKUPS AND ALERTING

- Protects your business against data deletion or corruption, accidental or otherwise
- Able to roll back to earlier versions of data after changes have been made to live data

MORE RELIABLE THAN TAPE/MANUAL BACKUPS

- Higher rate of restore success than with tape backups
- Full De-duplication and full data sovereignty

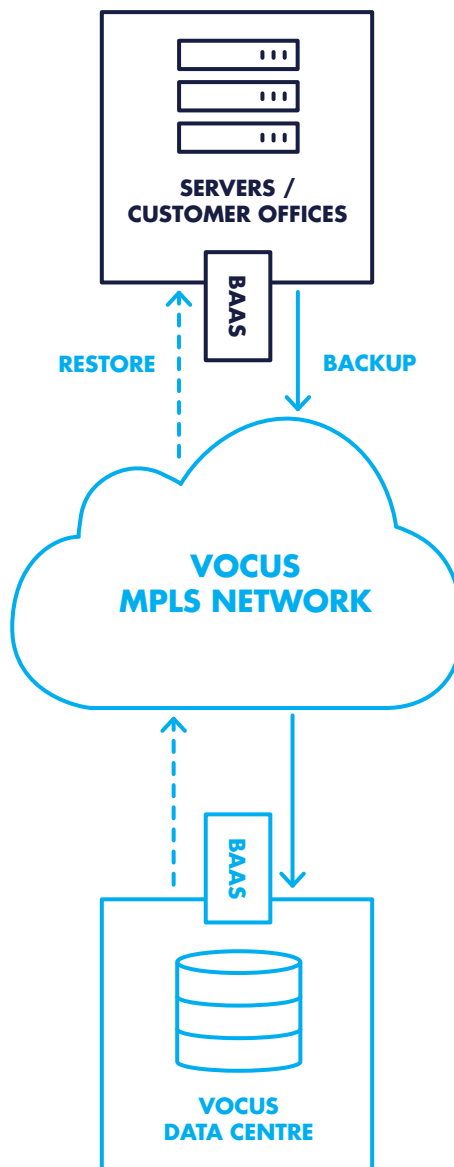

FLEXIBLE AND SCALABLE

- Designed for single and multiple site backup configuration
- Quickly scale up or down, on demand
- Our EMC Avamar infrastructure is managed 24/7 by specialists to ensure optimal uptime.
