

CLOUD BACKUP FOR VEEAM®

Cloud Backup For Veeam® makes it easy to extend your backup infrastructure to the Vocus Cloud, providing you with the additional peace of mind that comes from knowing your data is securely backed up offsite.

OUR SOLUTION FOR YOU

Cloud Backup For Veeam integrates hosted Vocus backup repositories (called cloud repositories) directly into the Veeam backup console. There's no separate console, and Vocus Cloud repositories work like other backup repositories – except they're available even if the primary backup repository fails.

Cloud Backup For Veeam, powered by Vocus Cloud, is a powerful, easy-to-use and affordable backup solution. Vocus Backup Connect seamlessly integrates with Veeam to provide fast, flexible and reliable recovery of data bringing virtual machine backup and replication together in a single software solution with award-winning support for VMware and Microsoft virtual environments.

Rapid, one-step backup and data recovery

Hosted offsite backups in the secure, enterprise-grade Vocus Private Cloud

Complete visibility and control from the backup console

Support for all major Enterprise operating systems

Delivers strong and reliable functionality to avoid the risk of data loss

A Secure Internet HTTPS connection, so configuration of firewalls is not usually required
