

CLOUD SERVICES.

Cloud services **built for business, your business.**

Want to learn more about how we can help you? Contact your Vocus Account Manager or call us on 1300 88 99 88 or visit vocus.com.au

CLOUD SERVICES.

Vocus cloud delivers secure, robust and scalable infrastructure as a service (IaaS) built on some of the world's most advanced converged infrastructure.

The question of cloud for organisations is no longer "if" but "where"? Choosing the right cloud provider for critical business infrastructure is more than just comparing brochures; it's about choosing a provider who is in control end to end.

Vocus stands apart from other providers, as we offer the complete spectrum of services needed to empower your business – Cloud, Connectivity, Internet and Unified Communications.

Your servers are key to your operations and growth. It makes sense to choose a cloud provider that also controls the network, the key data centres housing the cloud platform and the enterprise grade hardware running it all. It's even better if that provider offers you Unified Communications and Internet too.

Vocus offers all these services, so you deal with one team that is focused on delivering you a great experience across all services.

With Vocus Cloud Services, you can create servers in your own virtual private data centre, backup your data and provide for disaster recovery, all hosted in secure data centres across Australia and New Zealand.

If you need a hybrid cloud solution, Vocus Cloud Connect provides a secure and direct connection from your inter-office WAN and Vocus Cloud services to the major public cloud providers like Amazon Web Services and Microsoft Azure.

WHO IS IT FOR?

Vocus offer a range of Cloud Services for all business sizes, all backed by our carrier-grade, high-performance fibre network.

END TO END, BUILT FOR BUSINESS.

Vocus Cloud Services are designed for availability and resiliency. Built on enterprise carrier grade infrastructure, they are housed in secure data centres and connected using our highly reliable network.

SCALE WITH YOUR GROWING BUSINESS.

Reserve the resources you need and pay for what you use, avoiding potential for waste from fixed size bundles.

PROTECTED AND SECURE DATA.

Experience enterprise-grade security and peace of mind backed by service level agreements, underpinned by many years of cloud and data centre experience.

CONTROL COSTS.

Buying hardware requires capital outlay. With Vocus Cloud Services, you pay monthly only for the resources you are allocated or consume.

CONNECT TO MULTIPLE LOCATIONS.

Benefit from the Vocus network, delivering up to 10Gbps between multiple locations or connect securely via the Internet using SSL or IPSec VPNs.

AUSTRALIAN & NEW ZEALAND ZONES.

With multiple availability zones within Australia and New Zealand, experience low latency services and high availability in your region.

SUPPORT YOU CAN COUNT ON.

Enjoy the benefits of dealing directly with the support teams and staff who run the platforms you use.

CLOUD COMPUTE.

Empower your business infrastructure by leveraging the power of Vocus Cloud platforms that are built for business - highly available, highly secure, cost effective and highly connected.

Built For Business. Cloud Compute is a multi-location, shared cloud IaaS platform that delivers the building blocks of CPU, memory and tiered disk.

Optimise & Control Costs. Purchase a pool of resources to use in your own virtual data centre as required. Unlike fixed size servers, you control your server sizes to suit your needs.

Software Options. Consume Microsoft, Linux and other software that you need on a monthly basis and ensure that you can always access the latest versions.

CLOUD DISASTER RECOVERY.

Cloud Disaster Recovery provides business continuity and peace of mind by protecting your critical Vocus cloud servers for rapid deployment should disaster strike.

Speed You Can Rely On. When disaster strikes, keep your business running and recover your workloads rapidly using geographically separate alternate cloud servers that seamlessly synchronise.

Flexibility And Assurance. Our experienced team will design a Disaster Recovery solution to suit your needs and budget.

Peace Of Mind. Rest easy knowing that system failures, human error or natural disasters won't cripple your organisation. Scheduled failover testing ensures that there are no surprises.

CLOUD CONNECT.

Build your hybrid cloud using Cloud Connect – your private, high-speed connection to public clouds, like Amazon Web Services (AWS), Microsoft Azure.

Simple & Secure Public Cloud Access. Cloud Connect delivers secure, dedicated, private and low latency access to Amazon Web Services, Microsoft Azure and IBM Softlayer.

Hybrid Cloud Made Easy. Cloud Connect can fully integrate with your Vocus Ethernet or IP-WAN network, making your hybrid cloud solution simple, reliable and secure.

Cut Costs. Enjoy lower data transfer rates from your public cloud provider. When data-heavy enterprise applications connect via Cloud Connect, you can also save by reducing your Internet traffic.

BACKUP AS A SERVICE.

Vocus Cloud Backup as a Service (BaaS) puts you in control of your backup and recovery process from start to finish. All your data is backed up to our enterprise-standard data centres via a secure private connection over the Vocus network.

Cost Efficient. Save up to 20% over tape backup where no hardware, licensing or capex is required. We offer a pay-as-you-go model with a fully de-duplicated data.

Take Control. Backup and recovery can be scheduled, managed and audited via your own dedicated portal from anywhere, at any time with the One-touch backup and restore from Virtual Environments – VMWare and Microsoft Hyper-V.

Secure. Feel secure with highly resilient storage environment so your data stays safe in Vocus owned data centres.

CLOUD BACKUP FOR VEEAM – POWERED BY VOCUS.

Cloud Backup For Veeam® makes it easy to extend your Veeam backup infrastructure to the Vocus Cloud, providing you with the additional peace of mind that comes from knowing your data is securely backed up offsite.

Safe & Secure. The connection to Veeam Backup Connect is over a secure internet HTTPS connection, so configuration of firewalls is not usually required.

Highly Cost Effective. You only pay for the space you use, not the inbound or outbound traffic that your backups utilise.

Data & Vm – Easy. With support for popular VM providers, and simple data, Backup Connect is a great solution for medium-size businesses.

FIREWALL AS A SERVICE.

Firewall as a Service (FWaaS) is your all inclusive Vocus Cloud Internet, Hosted Firewall and Cloud Gateway Solution. It is offered on a subscription basis with no up-front CAPEX costs.

Comprehensive Protection. Includes Anti-Virus, Anti-Malware, web/content filtering, secure remote access application control and Intrusion Detection/Intrusion Prevention System (IDS/IPS)

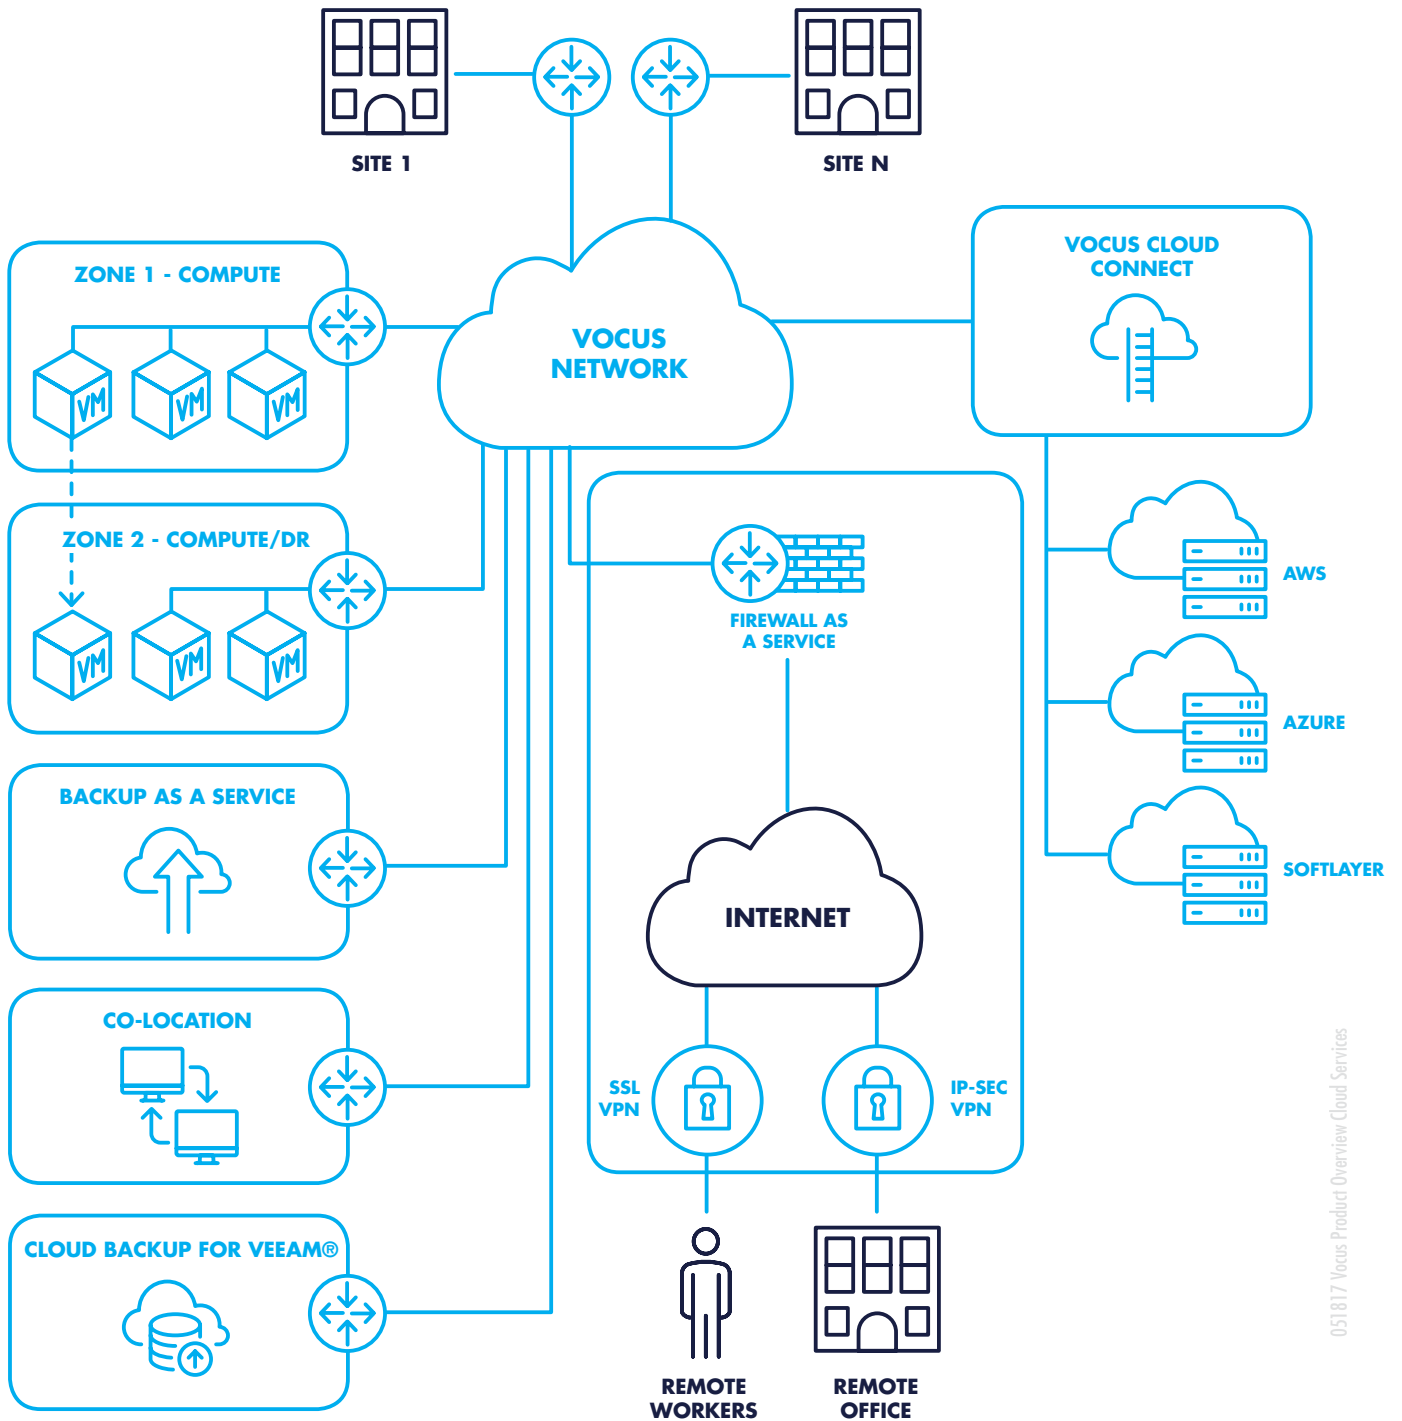

Remote Access. VPN for secure connectivity by branches or remote workers.

High Availability. Built-in and optionally enhanced redundant system architecture to ensure your business stays online 24/7.

Note: Not all services are available in all zones. Please refer to your Account Manager for more information.
